Standard Deviation	0.71
Total Responses	9

21. In what ways, if at all, has this course changed your professional practice as a technology integrator?

**Text Response**

I've learned so much about technology and its effect on learning through this course...I will definitely be integrating more technology into my professional life as a result of taking this course!

It has allowed me to consider closely my tech choices and their effectiveness for my own practice.

I want to implement aspects of technology but also aspects of action research. I am going to begin reflecting more s a result of this course and how technology can improve my teaching.

Exposure to concept of situated and embodied learning was significant in improving my practice.

This course really helped me apply technology to my classroom.

22. In what ways, if at all, could the course design be improved, in your view?

Text Response
Honestly, I feel that this was one of the most well-designed online courses I've ever taken. It was extremely organized, making it easy to navigate.
It helped improve my view and understanding

23. Please provide comments here that you would like to share with your instructor regarding his/her contributions to your learning. Constructive suggestions for improvement, as well as specific things your instructor did especially well are welcomed.

**Text Response**

I feel that you were an amazing instructor! Your detailed answers to any questions I had throughout the semester and feedback for each and every assignment was greatly appreciated! It's nice to have a professor that is positive and enthusiastic at all times :)

When I signed up for the class, I based my choice on the title: Teaching and Learning in schools and other environments. I felt the course was missing a component: "other environments." I was looking forward to learning about practice in, for example, adult ed. settings, or corporate settings etc. I felt that I enhanced my classroom practice, but I wanted to learn more about teaching outside of the school environment. I did not expect the tech component to be such a central feature of the course.

Thank you! I enjoyed the class. Thank you for encouragement and understanding
